10 OCT 5 AM 10 33

Mr. Joe D. Ramey  
District Supervisor  
New Mexico Oil Conservation Commission  
Hobbs, New Mexico

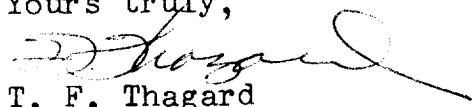

Dear Mr. Ramey:

I am sending form 103 to cover running of intermediate and production strings in the Vinson #1, Lea County, New Mexico. It is my understanding that this will bring your files up to date. I want to appologize for not seeing that this was done properly, I was under the impression that the Consulting engineer hired to complete the well had taken care of filing the necessary forms.

If the enclosed forms are not properly filled out or if there is any further information you require please let me know.

The Vinson #1 was spudded on April 13, 1960, and the production string run on July 18, 1960. To date we have been unable to successfully complete the well, at the present time I am waiting on the findings of an engineering study to descide if it is feasible to make further attempts to complete the well.

Yours truly,

  
T. F. Thagard
