

Supplement 1 Page #1

Forest Oil Corporation. Federal-Warren #1, Subsequent Report of Abandonment

This well was plugged in the following manner :

Halliburton Oil Well Cementing Co. pump spotted 50 sacks of cement from 9711' (P.B.T.D.) to 9549'-a 162' plug- through open end drill pipe.

The hole was muddied with 10# mud from 9549' to 4367'.

From 4367' in open hole to 4206' in the intermediate casing a 50 sack plug was spotted through open end drill pipe.

The hole was muddied with 10# mud from 4206' to 4000'.

At 4000' to 3919' a 25 sack plug or 81' of cement was spotted through drill pipe.

At 4000' a Baker Model "K" cast iron retainer bridging plug was set with 35,000# tension.

From 3919' to surface was filled with 10# drilling mud.

On top of the intermediate casing string is installed a swedge nipple on top of which is a 2" 4000# test plug valve shut in.

In the top of the plug valve is a swedge nipple into which is installed a 4 $\frac{1}{2}$ " OD permanent metal marker closed in on top which extends 4.66' above the ground level and which is painted with aluminum paint.

The cellar has been filled in, the pits covered and the location cleared of junk.

Enclosed are duplicate copies of the electric log run to total depth in this well by Schlumberger Well Surveying Corporation.
