OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the

Oil Development Company of Texas SFP RR Well No. 1-20 in SW SE
Company or Operator
of Sec. 20, T. 9S, R. 36E, N. M. P. M., Crossroads Field.
Lee County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Drilled 17 1/2" surface hole to 348 Ft. Ran 310.5 Ft. of 13 3/8" OD 48# H-40 new seamless surface casing and cemented same at 314.5 Ft. RDF with 350 sack of Howco bulk cement; plug down at 8:00 PM 11-20-51. Cement circulated to surface.

Plan to test 13 3/8" surface casing after drilling plug with 500# pressure for 30 Min. as prescribed in regulations. This testing will be performed at approximately 12:00 PM Nov. 21, 1951 after cement has set about 30 hours.

The testing will be performed by Mr. Bill Lambert, toolpusher of the Geo. P. Livermore, Inc. drilling company who are the contractors for this well.

Title _____

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

2. The second step is to define the objectives and goals of the project. This involves determining what you want to achieve and how you will measure success.

3. The third step is to develop a plan of action. This involves identifying the resources needed, the tasks to be completed, and the timeline for the project.

4. The fourth step is to implement the plan. This involves putting the plan into action and monitoring progress.

5. The fifth step is to evaluate the results. This involves assessing the outcomes of the project and determining whether the objectives have been met.

6. The sixth step is to report on the results. This involves communicating the findings of the project to the relevant stakeholders.

7. The seventh step is to reflect on the process. This involves thinking about what worked well and what could be improved for future projects.

8. The eighth step is to share the results. This involves making the findings of the project available to a wider audience.

9. The ninth step is to celebrate success. This involves acknowledging the achievements of the team and the project.

10. The tenth step is to learn from the experience. This involves using the lessons learned from the project to inform future work.

11. The eleventh step is to maintain the results. This involves ensuring that the outcomes of the project are sustained over time.

12. The twelfth step is to review the process. This involves looking back at the entire project and evaluating its overall effectiveness.

13. The thirteenth step is to document the process. This involves creating a record of the project for future reference.

14. The fourteenth step is to disseminate the results. This involves making the findings of the project available to a wider audience.

15. The fifteenth step is to evaluate the impact. This involves assessing the long-term effects of the project.

16. The sixteenth step is to report on the impact. This involves communicating the findings of the impact evaluation to the relevant stakeholders.

17. The seventeenth step is to reflect on the impact. This involves thinking about the long-term effects of the project and how they can be used to inform future work.

18. The eighteenth step is to share the impact. This involves making the findings of the impact evaluation available to a wider audience.

19. The nineteenth step is to celebrate the impact. This involves acknowledging the long-term effects of the project and the team's contribution.

20. The twentieth step is to learn from the impact. This involves using the lessons learned from the impact evaluation to inform future work.

21. The twenty-first step is to maintain the impact. This involves ensuring that the long-term effects of the project are sustained over time.

22. The twenty-second step is to review the impact. This involves looking back at the entire project and evaluating its overall effectiveness.

23. The twenty-third step is to document the impact. This involves creating a record of the project for future reference.

24. The twenty-fourth step is to disseminate the impact. This involves making the findings of the impact evaluation available to a wider audience.

25. The twenty-fifth step is to evaluate the impact. This involves assessing the long-term effects of the project.

26. The twenty-sixth step is to report on the impact. This involves communicating the findings of the impact evaluation to the relevant stakeholders.

27. The twenty-seventh step is to reflect on the impact. This involves thinking about the long-term effects of the project and how they can be used to inform future work.

28. The twenty-eighth step is to share the impact. This involves making the findings of the impact evaluation available to a wider audience.

29. The twenty-ninth step is to celebrate the impact. This involves acknowledging the long-term effects of the project and the team's contribution.

30. The thirtieth step is to learn from the impact. This involves using the lessons learned from the impact evaluation to inform future work.
