In re: Salt Water Disposal  
Section 5, T-9-S, R-36-E,  
Lea County, New Mexico

---

New Mexico Oil Conservation Commission  
P. O. Box 2088  
Santa Fe, New Mexico

Attention: Mr. A. L. Porter, Jr.

Dear Sir:

BTA Oil Producers is hereby applying for administrative approval to dispose of water in the San Andres zone of its Bond #1 (formerly WEK Harris Federal #1) located 990' FSL & 660' FEL Section 5, T-9-S, R-36-E, Lea County, New Mexico.

We anticipate disposing 4000 barrels of produced Pennsylvanian (Bough C) water per day into the San Andres formation at a depth of 4800' with a surface pressure of approximately 350 psi. Although we do not have a water analysis at this time, a DST indicated the San Andres water contains chlorides in the neighborhood of 132,000 ppm, and analysis of the Bough C water in the immediate area indicates chlorides of 73,000 ppm.

The enclosed data is submitted in support of this application.

Yours very truly,

  
WILLIAM G. KERN  
For BTA Oil Producers
