Re: Special Gas-Oil Ratio Test
State "K" N^o 2
Unit "L" Section 21-T11S-R33E
Bagley; Permo Penn, North
Lea County, New Mexico

Dear Ms. Morgan:

As discussed previously in conversations with you and Mr. Chris Williams, this well has been uneconomic to produce due to repeated tubing leaks. However, it does flow gas at an economic rate, if this well is not pumped. As a result, Chaparral Energy, Inc. requests that the New Mexico Energy, Minerals & Natural Resources Department accept this gas rate in lieu of an actual GOR for this Scheduled Gas-Oil Ratio test. Currently, this well and the State "K" N^o 1 are being evaluated for future repairs or plugging. I hope to have this review complete, soon.

Your help in this matter has allowed CEI to better deplete the gas reserves of this well. If you have any questions regarding this filing, please contact Jim Bauer @ 405/478-8770 ext. 228.

Sincerely,

James W. Bauer, P.E.
Operations Engineer
