 Battles 687 Ltd. #1 *B-7-9-36*
 Capitan 687 Ltd. #2 *L-2-9-35*

Dear Sir:

A recent inspection of the surface location of the above well, found that additional work will be necessary before the Commission can approve the plugging bond or release of this location. Work needed to location is as follows:

All three of the above P&A locations, located in the Vada Penn Pool, were reported ready for final surface inspection, but all three failed due to the batteries being on location and all the battery pads need leveling. Please take care of this matter as soon as possible.

Please notify the Commission only when the above work is completed, and a Commission representative will reinspect this location.

Sincerely,

NEW MEXICO OIL CONSERVATION COMMISSION

John W. Runyan
