7. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

On October 19, 1979, the rods and pump were pulled; while preparing to pull the tubing, packer was found unseated. Packer was resealed and well placed back on production; water failed to decrease with very little oil production. On October 25, 1979, tubing was pulled and a cast iron bridge plug was set at 9800'. Well was placed back on production, and is currently producing oil and gas, from perforations 9471' - 9485' (original completion interval).

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
