RE: Form C-103 for Recompletion Attempt of SFPRR 27 No. 3  
Crossroad Siluro-Devonian Pool, Lea County, New Mexico

Attached please find five (5) copies of subject form. We attempted to recomplete the subject well to the Crossroads Pennsylvanian Pool; however, we found the Crossroad Penn to be dry. Subsequent operations involved squeezing the Penn perforations and re-establishing the well as a Devonian producer. We added 1000' of tubing and rods to the pumping string to increase our withdrawal rate from the Devonian. Form C-116 is attached in duplicate requesting an increased allowable as a consequence to lowering our Devonian pump.

Please advise if further information or forms are required.

Sincerely,

Anthony J. Welker  
Petroleum Engineer
