September 22, 1973

Oil Conservation Commission
Hobbs District Office
1000 West Broadway
Hobbs, New Mexico 88240

Gentlemen:

It has been brought to our attention that the allowable on our Allied "93" No. 1 has been cancelled for September. In checking the proration schedule for May through August, 1973, this well was listed in the Sawyer San Andres Field. However, the September through December, 1973 proration schedule does not list this well.

Please correct this error and issue a supplement notifying The Permian Corporation. The well still produces at the rate of 9 barrels oil per day.

Thank you.

Yours very truly,

Byron H. Greaves
Production Manager
