This well was drilled to total depth (4515') with no show of oil or gas. Casing was set and an attempt was made to complete in the San Andres (see C-105). The well was swabbed and recovered formation water. We propose to temporarily abandon until offset wells are completed and an analysis completed. The complete tree, tubing, and packer will remain installed until a decision is made (within next 60 days).

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
