Re: State "11" No. 1-L
Sec. 11, T-10-S, R-32-E
Lea County, New Mexico

Gentlemen:

As reported on Form C-103 on 3-10-88, an attempt was made to recompleate the referenced well in the Wolfcamp. Intervals 8162'-8166', 8211'-8220', 8234'-8238', 8246'-8255', and 8280'-8282' were perforated and acidized. This recompleation attempt was unsucessful and the Cisco perforations 8802'-8950' were reopened to production.

Oil and gas production from the well after completion of this work was unchanged from production rates prior to the recompleation attempt. Therefore, no oil or gas is being given up by the Wolfcamp perforations.

We respectfully request your permission to leave the Wolfcamp perforations open.

Yours truly,

W.M. Groesbeck
