08/07/76 Started drilling @ 4987' caught 5" samples & logged 1' drilling time to 5005' present T.D. Formation dolomite, 100% stain & saturation w/fair to good porotisy. Oil on pit-no measurable fluid loss. Round trip w/tbg. went back to 5003' with 61' tail pipe. Guiberson UNI #4 pkr. set at 4941', between csg. collars 4929'-4965'. Swabbed 16.0 BB1 KCL water, 30" test. Swabbed 1/4 BB1, no oil, no gas, no odor. Sat. morning no press. on tbg. slight vac. on csg. Swab 1½ BBls 2% KCL water, no show. Swabbed dry. RU Universal 03/08/76 Treating Co. Leveland, Texas loaded hole & spotted 20% HCL, 2' off bottom, pkr. unseated. Csg. connected to test tank, treated as follows: Acid Batch Acid Time T.P. С.Р. Gals.in zone Initial Or zone -0-2 1/2 hr. -0-200 3 1/2 hr.200 7 gals 400 4 1 hr. ½ hr-600 800 18 gals ⅓ hr-800 25 gals 100**0** 5 1 hr ½ hr-800 1000 7 gals 27^{gals} 3/4 hr-1000 120**0** 6 34 gals 1 hr1000 120**0** 7 23 ga**ls** 1 hr ½ hr-1000 1200 25 ga**ls** ½ hr-1250 140**0** 8 1½ hr 1500 165**0** 165 gals 333 gals=7.9 BBls SION w/1500# psi set on tbg. 08/09/76 Tbg. on vac. 8:00 a.m. Sunday. Fm. had taken 2 BB1s acid overnight. Press. to 1500# psi-taking at rate of 11/2 gal/ min. Inc. to 1600# psi rate still 1½ BPM @ 2:00 p.m. Reversed acid to pit, pulled tbg. up 3'-bottom now at 5000', pkr. set @ 4937'. Total acid in fm. 19 BBl in 28 hrs. Total fluid to recover 38 BBls, swabbed 53 BBls in 3½ hrs. Approx. 10 BBls being oil (will color cut overnight) Note: A redish brown emulsion appeared at the 43 BBIs of recovery. SION. 9:00 a.m. 175# TP, FL 600' 80-90% water. Sunday recovered 53 BB1s, 21 80 & 32 BW. T.D. 5005' @ 2:00 p.m. 08/09/76 swabbed 31.5 881s fluid 08/10/76 in 4 3/4 hrs. Avg. 6.6 BBls/hr. Tight emulsion, no free water. Will chemical treat for oil-water ratio. Rig broke down for 4 hrs. Resumed swabbing for 2 hrs. Swabbed tbg. dry. Recovery today 37 BB1s plus 53 BB1s Sunday. 90 BBIs total formation fluid. Oil sample were treating out 20% water. TP 50# psi, 125' of fluid in hole. Pulled swab 6 times. 9.5 BBls of fluid, 40% water. 2:00 p.m. report as follows, swabbed 4 hrs, recovering 5', BBls/hr. Est'd. 08/11/76 500 COR. Treated Oil in test tank, 60 BBIs reduced to 63 BO & 17 DW or 21% water. Masgated pkr. & swabbing bole down. Prep. to install Production equipment. Released pkr. Swabbed 56 BBls of 121 BBls to be recovered 08/12/76 Swab line broke. Pulled tbg. changed out pkr. w/pump equipment. S.N. @ 4977'. Will swab remaining pkr. water before going in tbg. w/pump. ۰. 08/13/76 Swabbed until 1:00 p.m. started running pump & rods.

Connect well-head & flow line to tank. 42 BBls of 2% KCL water to be recovered from well before gauge of formation fluid.
