Attention: Jerry Sexton

RE: Landlady #1  
Sec. 8, T12S-R32E  
Lea Co., New Mexico

Dear Jerry:

In reference to your letter of February 3, 1988 regarding the cancellation of the C-101 on the above referenced lease. For some reason the C-103 was not filled out and returned to your office.

The remedial work did take place and was started on June 3, 1987 and completed on June 23, 1987. Pumping unit and tank battery installation was started on July 24, 1987 and completed on July 30, 1987. Potential test taken August 6, 1987. In one week production decreased to 2-3 BOPD + 50-60 BWPD. Well was pumped 2 to 5 days per week just to keep equipment in working condition. Below is production from C-115:

	Bbls Prod.	Days	Ending Balance	To Transporter
July 1987	28	2	71	-
August 1987	113	30	184	-
September 1987	83	30	93	174
October 1987	51	11	144	-
November 1987	1	2	145	-
December 1987	9	5	154	-

This well is still being pumped about 2 days a week.

Page 2

Attached please find C-104, C-103 and an abbreviated workover report on what was done on workover.

Sincerely,

A handwritten signature in black ink, appearing to read 'J.T. Janica, Jr.', with a stylized, cursive script.

J.T. Janica, Jr.

Re: Intention to Recomplete -- Cancellation  
Landlady #1-B  
Section 8, T12S, R32E

Gentlemen:

More than six months has elapsed since Form C-101 was approved for the recompletion of the subject well from the Mississippian to the Wolfcamp. To date no progress reports have been received. Therefore, approval of your intention has expired and no recompletion operations are to be initiated without further notice to and approval by the Oil Conservation Division. Pending such further approval, this intention to recomplete will be considered cancelled.

Very truly yours,

OIL CONSERVATION DIVISION
