The subject well was drilled to the San Andres in November 1978. The well has produced 8 28 barrels of oil, but due to the large volumes of water, operating the well is uneconomical. The well was shut-in November 13, 1979, due to a stuck pump. A well test in November indicated 2 BOPD and 81 BWPD.

MGF Oil Corporation hereby requests temporary abandonment for the subject well.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
