PLUG AND ABANDONMENT ☐

17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

On January 21, 1988, we determined that the well had a hole in the production casing @ approximately 5200'. We immediately rigged up on well and cement squeezed the hole and circulated cement back to the surface utilizing 300 sacks of Class H. We have no explanation as to how the hole in the casing came about.

We immediately spent the next twelve days cleaning up the reservoir attempting to reclaim the drilling mud and foreign materials which were exposed to the producing formation through the hole in the casing.

The well was put back on pump on February 4, 1988. The first show of oil production occurred February 12, 1988. The well is still cleaning up.

8. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
