

Western Reserves Oil Company, Inc. proposes to recomplate the State "26" No. 1 well located 330' FSL and 2310' FWL of Section 26, Township 10 South, Range 33 East, Lea County, New Mexico to a Salt Water Disposal. Injection will be into the Devonian formation. The well is located in the Vada Devonian Pool.

VI. Tabulation of Data on Wells

OPERATOR	LEASE	WELL NO.	LOCATION
Western Reserves Oil Co., Inc.	State "26"	2	1980 FSL & 1910 FSL Sec. 26, T10S, R33E
Western Reserves Oil Co., Inc.	State "26"	4	2310 FNL & 2310 FWL Sec 26, T10S, R33E
Western Reserves Oil Co., Inc.	State "26"	3	1650 FSL & 2310 FWL Sec 26, T10S, R33E
Union Pacific Resources Co.	State "35"	1	725 FNL & 2040 FWL Sec. 35, T10S, R33E
Jake L. Hamon	State "E" 873	1	660 FNL & 660 FEL Sec 35, T10S, R33E
Southern Union Exploration Co.	South Lane SWD	D-35	500 FNL & 500 FWL Sec 35, T10S, R33E

VII. It is proposed that a maximum of 5,000 barrels of produced water will be disposed per day while the average rate is expected to approach 3000 Barrels per day. Waters to be disposed will come entirely from Western Reserves Oil Company's nearby producing wells. Water to be disposed initially will come from the State "26" lease, Well, No. 3.

It is expected that injection will take place under gravity, however a maximum injection pressure of 1250 psi is requested to be approved.

An analysis of waters from the State "26" lease is enclosed. This well is producing from the Devonian formation as will be used for disposal in the No. 1 well.
