RE: Request for Additional Test Allowable  
S.L. Federal "20", Well #1,  
Jenkins; Devonian NE Pool  
UL. A, Sec. 20, T9S, R35E

Dear Mr. Sexton:

Maralo, Inc. requests an additional test allowable of 1000 barrels for the above well.

The well required retreatment in February, 1995, and while attempting to get a test flow, produced another 800 barrels. We have since set a pumping unit and need to clear the tanks in order to run an accurate potential pump test.

Thank you for your assistance.

Sincerely,

A handwritten signature in cursive script that reads "Dorothea Logan". The signature is fluid and elegant, with a long, sweeping underline.
