CASING TEST AND CEMENT JOB ☐
OTHER: ☐

12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Yates Petroleum Corporation respectfully requests permission to alter the drilling plan & drill a 1000' horizontal lateral due west in the Devonian dolomite.

Kick off point will be at approximately 12857'. Angle will be made in a westerly direction at 12 to 20 degrees per 100' with entry into the Devonian at about a 45 degree angle. This angle will be carried into the Devonian as a pilot hole drilled to a TVD of 13190'. 7" casing will be ran at this point to TD. A whipstock will then be set at the top of the Devonian and the angle will be built close to horizontal, and the wellbore will head due west in the porosity for a total estimated displacement of 1000'.

Surface Location: 700' FNL & 1650' FEL
Proposed BHL: 700' FNL & 2650' FEL
