November, 1962

Love Federal 1-1
Well No. 4 is located 660 ft. from N line and 660 ft. from E line of sec. 5

5-4-4-5 (1/4 Sec. and Sec. No.) T-8 (Twp.) 10-10 (Range) 10-10 (Meridian)

Undesignated (Field) Doña Ana (County or Subdivision) New Mexico (State or Territory)

The elevation of the ~~surface~~ ^{ground level} above sea level is 4130 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well at the above location with rotary tools to an approximate total depth of 1000' to test the producing capabilities of the Blaunder zone of the San Andres formation. 400 ft. of 5 1/2" surface casing will be set & cemented to surface. Should the well prove productive, 4 1/2" casing will be set to T.B. & cemented with sufficient quantity to have 1000' of fill-up behind the pipe.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
