17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

To answer your form questions, this well is not shut in. It is producing daily.
Estimated producing rate 2 BOPD.

It does not appear to be making money because it takes 3 to 4 months for the 2 wells to fill a 500 bbl tank. The well produced at a profit last year because of the increased oil price.
