Dear Mr. Ramey:

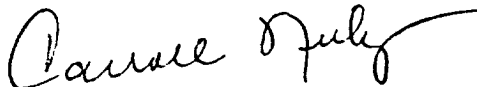

I have recently recompleted my Lone Star Federal #1 located in section 20-T8S-R36E in Roosevelt County, New Mexico

My completion report results showed the well was capable of producing only 100 MCF per day and 3 bbls. of oil.

Since the well is not capable of producing as a prorated unit for 320 acre spacing, I would like to request an allowable for an unorthodox 40 acre producing unit.

Please let me know if there is anything else you need in order to issue an authorization to produce this well.

Very truly yours,
