Re: Conversion of Wells to Water Injection
Milnesand (San Andres) Unit
Roosevelt County, New Mexico

Gentlemen:

On July 29, 1976, we submitted Sundry Notices and a Revision of Initial Plan of Operation in accordance with Section 11 of the Milnesand (San Andres) Unit Agreement, to convert the following wells to water injection.

1. Milnesand (San Andres) Unit #31, Unit "L", Sec. 18, T-8-S, R-35-E
2. Milnesand (San Andres) Unit #33, Unit "J", Sec. 18, T-8-S, R-35-E
3. Milnesand (San Andres) Unit #35, Unit "N", Sec. 19, T-8-S, R-35-E
4. Milnesand (San Andres) Unit #182, Unit "D", Sec. 18, T-8-S, R-35-E
5. Milnesand (San Andres) Unit #192, Unit "J", Sec. 13, T-8-S, R-35-E

Mr. Joe D. Ramey approved only the Revised Plan of Operation of the Milnesand Unit Area (August 5, 1976) and not the conversion of the subject wells. Mr. Ramey stated approval for conversion to water injection would be given only upon proper application being filed in accordance with the provisions of Rule 701 B of the Commission Rules and Regulations. Therefore, we are submitting the following attachments in compliance with Rule 701 B.

1. A plat of the Milnesand (San Andres) Unit - showing the locations of the proposed injection wells.
2. Logs of the proposed injection wells.
3. Diagramatic sketches of the proposed injection wells.

Water will be injected into the unitized formation of the Milnesand (San Andres) Unit at an approximate depth of 4530' to 4650'. The injection pressure will be approximately 1200 psi. The injection Rates will be as follows:

<u>Well No.</u>	<u>Injection, BPD</u>
31	363
33	393
35	556
182	264
192	303

The water injected will be from our existing facilities. This water is obtained from Mobil's Crossroads Field.

If this information meets with your approval under the provisions of Rule 701 B, we respectfully request permission to convert the subject wells to water injection.

If any additional information is needed, please advise.

Very truly yours,

UNION TEXAS PETROLEUM CORPORATION
