The elevation of the derrick floor above sea level is 4235 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to frac treat lower perforations 4579-99 with 20,000 gallons refined oil and 20,000# sand using 80 ball sealers.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
