The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plan to drill a Bough "C" well to a depth of approximately 9,700'. The pipe program is as follows:

13-3/8" to be set at approximately 350' with sufficient cement to circulate to surface.

9-5/8" to be set at approximately 4200' with sufficient cement to circ. to surface.

5-1/2" to be set at approximately 9650' with sufficient cement to obtain 1000' fill.

All casing will be set & cemented in accordance with approved methods.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
