(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Murphy Operating Corporation hereby requests that the above referenced well be granted an extension of its Temporary Status to August 1, 1987. This well is in the Bluitt San Andres Unit and plans are underway to begin a pilot waterflood utilizing this well. Work is planned to begin in June-July 1987, at which time this well may be tested and returned to producing status.

Murphy Operating Corporation proposes to test the above well by setting a packer approximately one-hundred feet (100') above the perforations and pressure testing the annulus by maintaining approximately 500# psi for 30 minutes. Should this well fail the above described test, it will be brought into servicable condition before being returned to producing status.

APPROVED FOR 5 MONTH PERIOD
ENDING AUG 17 1987

18. I hereby certify that the foregoing is true and correct
