Instructions

General: This form is designed for submitting proposals to perform certain well operations; and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; and/or other material placed below between and above plugs; diameter, size, method of parting of any casing, liner or tubing pulled and the depth of any left in the hole; method of blocking top of well; and date well was conditioned for final inspection looking to approval of the abandonment.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Drill plugs and clean out to 4000'. Run 4-1/2' liner from 3950' to 4000' and cement with 150 sacks. Perforate and stimulate, if necessary, San Andres and complete. This well was formerly drilled as the Shell No. 1 Blitt Unit.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
