17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

San Andres perms 4129-33, 4145-48 & 4173-78 will no longer produce gas in commercial quantities into low pressure sales line and no remedial possibilities exist. We propose to P & A as outlined below:

1. Set 30 sx cement in 4½" csg from 4180' to 3850'.
2. Shoot off and recover 4½" csg from free point (top of cement @ 3500').
3. Set 30 sx cement in and out of 4½" stub.
4. Set 35 sx cement across base of salt @ 2369' (if 4½" stub below this depth).
5. Set 35 sx cement across top of salt @ 2162'.
6. Set 35 sx cement across 8-5/8" shoe @ 333'.
7. Set 10 sx cement in top of well.

Leave 9#/gal gel mud between all plugs. 8-5/8" casing will remain intact. Erect dry hole marker. Clear & level location.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
