Re: Atlantic Richfield Company
State "BA" No. 2 Well
Todd Upper San Andres Field

Gentlemen:

In accordance with our discussion with Mr. Dan Nutter of the New Mexico Oil Conservation Commission's Santa Fe office, we plan to commingle well stream gas production from our State "BA" No. 2 well with that of our State "BA" No. 1 well. Both wells are completed in the Todd Upper San Andres Gas Reservoir. Separation and metering facilities will be located down stream of both wells. A physical connection has been made between the two wells and production will begin from Well No. 2 at whatever time you designate.

I understand that forms showing the change in name of the subject well from the Dalport No. 1 to the State "BA" No. 2, calculated open flow test results and other data have been sent to you. If any additional information is needed, let me know.

Yours very truly,

W. P. Tomlinson
