Midland, Texas 79701

Dear Sir:

We find that the below listed well has been plugged, but this office has never been notified this well is ready for final surface inspection. Your plugging bond cannot be released until the location is cleared.

An inspection on November 11, 1966 shows this well to need surface work.

We would like to clear this well from our P & A hold file. Please take care of this matter as soon as possible. Notify us when the well is ready.

O. G. McClain No. 1  
Unit N, Section 11, T8S, R34E

1. Pits not leveled.
2. Junk on location.
3. Battery location not leveled.
4. Cellar open, needs filling.

Very truly yours,

OIL CONSERVATION COMMISSION
