December 27, 1963

Well No. 1 is located 1750 ft. from N line and 600 ft. from W line of sec. 33

33 (1/4 Sec. and Sec. No.) 33 (Twp.) 33 (Range) W (Meridian)
Almont (Field) Boiseville (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We propose to drill to a total depth of approximately 4000 feet with rotary tools and complete in the sandstones formation. The casing program will be as follows: 6-5/8 inch 24", J-55 surface casing to be set 330 feet and cemented with 250 sacks. Cement will be circulated to surface. 4-1/2 inch 10.5", J-55 casing to be set 4000 feet and cemented with 150 sacks cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
