17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was converted to a salt water disposal well in January 1969, and actual injection was commenced January 10. Injection was discontinued in December 1971. We recently engaged Stephens Engineering to make a feasibility study of waterflooding the Todd Lower San Andres Pool. They have recommended waterflooding and we are presently attempting to form a unit for waterflooding for secondary recovery. If we are successful in forming the unit, this well will either be used as a producing well or as an injection well. We request permission to allow this well to remain at a temporarily abandoned status until a unit can be formed or a decision is made against waterflooding.

18. I hereby certify that the foregoing is true and correct
