Re: Amended Form C-128
Max Pray #1 Massey
Roosevelt County, New Mexico

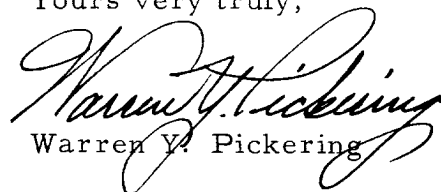

Dear Mr. Ramey:

Pursuant to instructions received from your office this date, please find seven (7) copies of an Amended Form C-128 for your consideration and files.

This revision has been brought about by our desire to dedicate our 80 acre spacing pattern in a north-south alignment instead of east-west as originally filed by Mr. John W. West. It is true that Mr. Pray is the owner of the full SE/4 (160 acres) of Section 15-8S-36E and that he may wish to drill a well on the E/2 SE (80 acres) at a later date. However, we much prefer that any future well be located in the approximate C SE/4 SE/4 Section 15 because of the very close proximity to the Nearburg and Ingram gasoline plant. This plant is located approximately in the S/2 SE NE Section 15.

Again, we ask that you return all copies not required by your files after you have indicated your approval.

Yours very truly,

Warren Y. Pickering
