4450	0.75	1.4410	64.8829

I hereby certify that I have personal knowledge of the facts and data as set forth above and as drilling contractor do certify that the well was not deviated intentionally from the true vertical whatsoever.

Geo. W. Baker V. Pres.
CACTUS DRILLING COMPANY

Affidavit:

Before me, the undersigned authority, appeared George W. Baker, Vice President of Cactus Drilling Company who on making deposition under oath did state that he was acting for and in behalf of the operator of the well identified above and that such well was not intentionally deviated from the true vertical whatsoever.

Geo. W. Baker
Signature of Affiant

Sworn and subscribed to before me, this the 24th day of February, 1966.

Agnes R. Brown
Notary Public in and for Lea
County, New Mexico

My Commission Expires Feb. 6, 1969

As the first of the 1940s began, the United States was in a state of economic depression. The country had been hit hard by the Great Depression, and the economy was still struggling. The government was looking for ways to stimulate the economy and create jobs. One of the ways it did this was by investing in infrastructure projects. The New Deal was a series of programs and policies that aimed to provide relief, recovery, and reform. The Social Security Act was one of the key pieces of legislation passed during this time. It established a system of social security that provided benefits to the elderly, the unemployed, and the disabled. The act was a landmark piece of legislation that helped to create a safety net for Americans. It was a response to the needs of the people who were suffering from the effects of the Great Depression. The act was a testament to the government's commitment to its citizens and its role in providing for their welfare. It was a step towards a more secure and stable future for the United States.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
