On the other hand, the *Journal of the American Medical Association* (JAMA) has been a vocal proponent of the medical profession's interests. In 1934, JAMA published a special issue on the "Medical Profession and the Public," which was edited by the American Medical Association (AMA). This issue contained several articles that criticized the public health movement and its advocates. For example, one article by Dr. J. H. Hays, a prominent AMA leader, argued that the public health movement was a threat to the medical profession's autonomy and control over the practice of medicine. He claimed that public health officials were seeking to "take over the medical profession" and "impose their own ideas of what is best for the public." Another article by Dr. W. C. C. Brown, also an AMA leader, argued that the public health movement was a "dangerous and unscientific movement" that was based on "unfounded assumptions and unsupported claims." He claimed that public health officials were "ignoring the facts of life" and "trying to force their ideas on the public."

The authors are grateful to Dr. J. H. Goldstein for his helpful comments.
