If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

In order to get this lease back in production, in is our intent, with BLM approval, to repace the cratered pumping unit on the #4 and install a motor and control panel on the #5. We plan to have this completed by May 15, 00'. #1 appears to have a stuck pump, we plan to have a pulling unit in the immediate area within the next 90 days and will make the necessary repairs to this well at that time
