Re: **P&A Well Surface Inspection  
30-7-33**

Dear Sir:

A recent inspection of the surface location of the above well, found that additional work will be necessary before the Commission can approve the plugging bond or release of this location. Work needed to location is as follows:

**State "30" #1, State "30" #2 and State "30" #4 wells all located in Section 30, Township 7 South, Range 33 East. All three P&A locations have deadmen that need removing and all have trash on location that must be removed as soon as possible.**

Please notify the Commission only when the above work is completed, and a Commission representative will reinspect this location.

Sincerely,

**John W. Runyan  
Geologist**
