Re: LACT Unit - Will 693 Ltd.
No. 91-066-SM-160

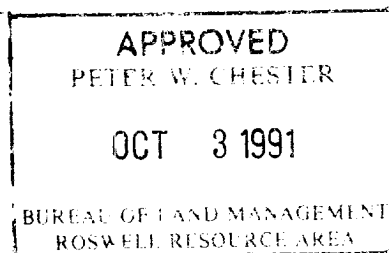

Dear Mr. Mayo:

When we installed the LACT unit on this lease in January, 1991, we had no knowledge of a requirement for an automatic temperature/gravity compensator. We installed the TA-1000 temperature average and felt like this would satisfy the Onshore Oil and Gas order No. 4 requirement.

In the 8 months this unit has been operating, we have had no problems with meter proving.

We respectfully request that we be allowed to operate this unit without installing an automatic temperature/gravity compensator at this late date. The extremely high cost of installing it would be prohibitive and would result in our removal of this LACT unit from operation.

*Contingent
on future
evaluation.*

Yours truly,
Gary T. Cothran
