17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is requested that an extension be granted to allow the subject well to remain temporarily abandoned for the next year. Plans are to try to re-complete in the San Andres zone and if that is not possible, it will be plugged and abandoned. The well is currently secured with a CIBP @ 4950' and 35' cement on top. The well has been loaded with inhibited water and is secured at the surface by a 2" valve.
