

- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment of the well, surface restoration will be in accordance with the agreement with the surface owner. Pits will be filled and location will be cleaned. The pit area, well pad, and all unneeded access road will be ripped to promote revegetation. Rehabilitation should be accomplished within 90 days after abandonment.

11. OTHER INFORMATION:

- A. TOPOGRAPHY: Land surface is undulating to gently rolling and dunny. From an elevation of 4052 feet at the wellsite, the surface slopes gently toward the South at about 30 feet per mile.
- B. SOIL: Soil is a deep fine sand underlain by caliche.
- C. FLORA AND FAUNA: The vegetative cover is generally sparse and consists of mesquite, yucca, shinnery oak, sandsage and perennial native range grasses. Wildlife in the area is that typical of semi-arid desert land and includes coyotes, rabbits, rodents, reptiles, prairie chicken, dove, quail, and an occasional antelope.
- D. PONDS AND STREAMS: There are no rivers, streams, lakes or ponds in the area.
- E. RESIDENCES AND OTHER STRUCTURES: The nearest occupied dwelling is a ranch house 1 1/2 miles Southeast of the wellsite. The nearest operating water well is 1400 feet Northwest of the proposed location.
- F. ARCHEOLOGICAL, HISTORICAL AND CULTURAL SITES: None observed in the area.
- G. LAND USE: Grazing and hunting in season.
- H. SURFACE OWNERSHIP: Wellsite and road are on surface owned by the New Mexico Game and Fish Department.

12. OPERATOR'S REPRESENTATIVES:

The field representatives responsible for assuring compliance with the approved surface use and operations plan are as follows:
