Re: Lse No. NM 0145685
Horton Federal Unit

Dear Sirs:

Attached are pressure recording charts on the Horton Federal Unit Well Nos. 13, 30 & 32. Each well was tested according to the procedures which were approved April 26, 1989. Each well held 500 psi for thirty minutes with no problems. If there are any further questions or problems, please contact me at (915) 688-0600.

Sincerely,

A handwritten signature in cursive script, appearing to read "Jerry Nevans".

Jerry Nevans
