Due to significant risk of not being able to get logs through the Redbed section and to the bottom of the hole, and possibly losing the hole due to Redbed sloughing, Read & Stevens wish to alter our proposed surface casing program from 400' of 8 5/8" casing, to 1,950' of 8 5/8" casing, to case the Redbeds behind pipe, and improve our chances of evaluating the borehole with a full suite of logs. Also, we wish to change our 4 1/2" casing set to TD, to 5 1/2" casing set to TD.

This statement is true and correct
