Loco Hills, N.M. Sept. 4, 1953

Well No. 1 is located 1980 ft. from N line and 660 ft. from E line of sec. 12
SE/4 NE/4 Sec. 12 7-5 30-E NMZN
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Undesignated Chaves New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ? ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On August 29, 1953, we ran 13-3/8" OD 48# 8rd thread used casing to 234' and cemented with 175 sack cement, cement circulated when plug was 30 feet off bottom.

After allowing to stand cemented for 48 hours, we tested with 1000# pressure for 30 min., with no drop in pressure.

Cementing was done by Halliburton Oilwell Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company General American Oil Company of TexasAddress Box 416Loco Hills, N.M.
