Describe the proposed program. If this application is to DEEPEN or PLUG BACK give the data on the present productive zone and proposed new productive zone. Describe the blowout prevention program, if any. Use additional sheets if necessary.

It is unknown what the true PBTD of this well is at this time. We propose to evaluate the well to determine the current condition of the well-bore. If the well is determined to be useful we plan to selectively perforate the San Andres gas section from 3050 to 3250 and acidize to test. If the well bore is determined to be un-usable or non-commercial, we plan to plug and abandon the well per NMOC rules and regulations.
