RE: C.L. O'Brien #1
Unit A, Sec. 7, T8S, R30E
Lightcap Montoya, West Pool

Gentlemen:

The above-referenced well was completed in the Montoya formation and in 1989 you perforated the Mississippian, Abo and San Andres and requested permission to TA the well for evaluation, and as of this date we have had no further reports.

Under our new TA policy any well that has not produced in one year must demonstrate mechanical integrity. The O'Brien #1 falls in that category, so please file your intention to do one of the following:

- 1) Return the well to production
- 2) Conduct a mechanical integrity test to maintain TA status
- 3) Plug and abandon

Your prompt attention to this matter will be appreciated.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
