(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

February 24, 19 59

Federal "BT"
Well No. 1-28 is located 2310 ft. from N line and 1650 ft. from E line of sec. 28
SW/4NE/4 Sec. 28 11S 30E N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildest Chaves New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3966 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill a 3500' San Andres test, using combination tools.

We will rotate to the top of the Anhydrite around 700' and cement 8 5/8" with 50 sacks in an eleven inch hole.

I will drill ahead from that point with cable tools. Should commercial production be encountered in the San Andres formation, a 5 1/2" oil string will be run and cemented.

All casing will be run and cemented under methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
