DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to use the following strings of casing and to cement them as indicated: Size of hole 12 1/2" 10 3/4" casing 4 1/2" SH 525 feet and approximately 1500 feet 8 5/8" if need and production string if necessary.

We would like permission to mud this string of pipe. If necessary we will cement with a few sacks. We will have to have a dry hole to drill with tools. We may have to run as high as 3 strings of pipe.

We plan to test the San Andres at about 2900 feet

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
