13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The above lease has 3 producing wells:

The Peery Fed. #1. Unit G Producing from Devonian. Gas Metered at unit J at the battery.

The Peery Fed. #2. Unit O Producing from the Morrow. Gas metered on location.

The Peery Fed. #3. Unit K Producing from the Morrow. Gas metered also on Unit O loc.

Each well has its own allocation meter. All gas is metered and then commingled on the surface. The gas is then sold through one common sales meter into GPM Gas Corporations low pressure gas line. The sales meter for GPM is also on location in Unit O. The average volume of gas for the Peery Fed. #1 Devonian is 100 mcf/d with BTU of 1460. The average volume for the two Morrow wells, Peery Fed. #2 & #3 is 1400 mcf/d with BTU of 1265. GPM is paying royalty on the average of all the gases combined with increases value of Morrow gas by enriching with Devonian.
