- ☐ Change of Plans
☐ New Construction
☐ Non-Routine Fracturing
☐ Water Shut-Off
☐ Conversion to Injection
☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

McClellan Oil Corporation requests approval for shut-in status on the Champeau Fed. No. 1. The well is capable of producing but is currently shut-in due to low gas prices.

The following will be scheduled and performed in accordance with applicable rules and regulations:

- 1) Bradenhead test
- 2) Production verification test
- 3) Fluid level Sonic test between tubing and casing.

McClellan Oil requests permission to run a fluid level Sonic test in lieu of a casing integrity test as putting fluid on the formation would be detrimental to the producing zone.

These tests will be conducted within 90 days of approval and subsequent to notification being given to the BLM.

14. I hereby certify that the foregoing is true and correct

Signed Mark McClellan Title President
