1. The first step in the process of the investigation is to identify the problem. This is done by the investigator who is responsible for the investigation. The investigator will identify the problem and then will determine the scope of the investigation. The investigator will then determine the objectives of the investigation and will then determine the methods of the investigation. The investigator will then determine the results of the investigation and will then determine the conclusions of the investigation.

1. *Chlorophyll a* (Chl *a*)

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked," or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of blowout or height of water.
