March 14, 1957

Federal-Well No. 2-8 is located 1574 ft. from [N] line and 2004 ft. from [E] line of sec. 8

NE 1/4 of Section 8 (1/4 Sec. and Sec. No.) 15-6 (Twp.) 11-2 (Range) T.14N. R.11E. (Meridian)

Cayman Queen (Field) Charon (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 4447 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Pulled tubing, pump and rods December 26, 1956. Duwell, Inc. treated perforations 1131-39 feet with 30,000 gallons of fresh water and 30,000 lb of 10-20 mesh sand. Run and landed 1136.35 feet of 2" NPS, 4.75, J-55, steel tubing at 1136.35'. Re-run pump and commenced pumping operations.

Treatment completed February 28, 1957. As a result of treatment, this well produced 10 barrels of oil and 6 barrels of water during 24 hour test, with gas-oil ratio too small to measure.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
